  GPA: 8.29/10

Skills

- **Programming:** SQL, Python, C#
- **Analytics:** Microsoft Excel, Data Validation, Root Cause Analysis, Business Process Analysis, UAT, Regression Testing
- **Enterprise Applications:** SAP SuccessFactors (Employee Central, Role-Based Permissions, Payroll), SAP HCM, ServiceNow, Jira
- **Databases:** SQL Server, Oracle (Basic)
- **Infrastructure:** Windows Services, IIS, Windows Administration
- **Tools:** Confluence, Azure DevOps, Git, Microsoft Office 365

Professional Experience

Support Engineer — NielsenIQ (NIQ) Oct 2025 – July 2026

- Provide L2/L3 production support for the Spaceman retail space planning application.
- Manage incidents, service requests, and change requests using ServiceNow while meeting SLA commitments.
- Investigate production issues through SQL Server queries, application logs, Windows Services, and system configurations.
- Perform root cause analysis and implement application configuration changes to resolve production defects.
- Execute functional and regression testing to validate fixes before deployment.
- Track incidents, defects, releases, and enhancements using Jira.
- Collaborate with developers, QA teams, and business stakeholders to resolve client issues.
- Support enterprise applications running on SQL Server, Windows Services, IIS, and C# applications.
- Prepare technical documentation and RCA reports for recurring production issues.

Software Engineer — HSBC (via NLB Services) Oct 2024 – Jun 2025

- Configured and supported SAP SuccessFactors security using Role-Based Permissions (RBP).
- Supported Employee Central and Payroll security configurations across multiple business units.
- Managed user access, permission roles, and security assignments based on business requirements.
- Assisted in payroll-related configuration changes and validation activities.
- Performed testing of configuration updates before production deployment.
- Investigated and resolved SAP SuccessFactors access and security-related issues.
- Worked closely with HR stakeholders to implement security enhancements and support business requests.
- Supported production releases by validating security configurations and ensuring successful deployment of SAP SuccessFactors changes.

Analyst — Deloitte USI
Jun 2022 – Sep 2024

- Configured SAP SuccessFactors Employee Central modules based on client business requirements.
- Worked on employee master data, organizational data, and workflow configurations.
- Supported employee lifecycle processes including hiring, transfers, promotions, and organizational changes.
- Assisted in migration of employee master data from SAP ECC to SAP SuccessFactors.
- Performed data validation and reconciliation following migration activities.
- Configured business rules, workflows, and employee data objects.
- Participated in User Acceptance Testing (UAT), defect resolution, and production support.
- Collaborated with HR teams to gather business requirements and implement configuration changes.
- Prepared configuration documentation, functional specifications, and testing documents.

QA Intern — Deloitte USI
Jan 2022 – Jun 2022

- Validated SAP SuccessFactors configurations and HR business processes during testing cycles.
- Assisted with employee data migration and verification activities.
- Executed functional and regression testing while documenting defects.
- Supported solution documentation and quality assurance activities for SAP implementations.

Projects

- **Retail Space Planning Support (NIQ):** Supported enterprise retail planning applications by analyzing production incidents, validating SQL Server data, performing root cause analysis, and coordinating releases through ServiceNow and Jira.
- **Vehicle Logo Recognition:** Applied computer vision for image classification in Python.
- **Phishing URL Detection:** Implemented classification models to detect phishing URLs, enhancing cybersecurity analytics.

Achievements

- **Applause Award** at Deloitte - USI (Apr 2023): Excellence in data staging, mining, and solving multiple test cases.
- **Spot Award** at Deloitte - USI (Feb 2024): Ensured smooth Go-Live execution.
- **DBMS Hack-A-Thon '19 Runner-Up** — VIT Vellore: Built a Library Management System using web technologies.
